

Important instructions for your move

- 1) **Lamps & pictures must be packed properly.** You may choose to move these items yourself or have them professionally packed by Mooney's. However they will not be transported in the moving van without being properly packaged.
- 2) **Clothing can remain in dresser drawers.** Be sure to pack anything that is fragile or breakable.
- 3) **All electronics and appliances (computers, televisions, washers & dryers) must be disconnected.** It is especially important to have gas dryers disconnected by professionals.
- 4) **All boxes must be sealed & have a lid.** We are unable to move boxes without lids and that are not sealed with packing tape. We also discourage the use of trash/plastic bags to pack items.
- 5) **We recommend the use of standard "moving boxes."** The use of small liquor size boxes typically increases the amount of time needed to complete your move (example: 3 liquor store boxes = 1 standard large size moving box)
- 6) **Wardrobe boxes are available upon request.** Notify our office prior to your move if you would like to rent these boxes. Each box will typically hold 20-25 hangers.
- 7) **Flat screen televisions:** Original box & packaging is best. If you do not have the original box please make arrangements to either transport yourself or call our office to purchase a "flat screen television box."
- 8) **Flammables & liquids cannot be moved:** Liquor, gasoline, paints, aerosol containers, cleaning products etc cannot be transported our trucks.
